

# Real-Time and Systems Programming for PCs

Christopher Vickery

McGraw-Hill, 1993

This is a list of errors found in the first printing of the book, *Real-Time and Systems Programming for PCs* by Christopher Vickery. (McGraw-Hill, 1993). I am offering a “bounty” of \$1.00 to the first person who reports each error. Submit errors to me by email: [vickery@ipcl.cs.qc.edu](mailto:vickery@ipcl.cs.qc.edu).

There are two copies of this document, a plain text file (`errata.txt`) and a PostScript file (`errata.ps`). The advantage of the latter is that it shows the desired fonts to be used as well as the content.

$reset quit

$ifexist %0.plm
run86 -fixplm /intel/bin/plm386.exe %0.plm compact debug

$set quit
$endif
$endif
$ifexist %2.plm
run86 -fixplm /intel/bin/plm386.exe %2.plm compact debug
$if not commandexcep = eok
$set quit
$endif
$endif
```

```
$if not quit
run86 /intel/bin/bnd386.exe %0.obj, &
